United Mechanical, Inc. (UMI) is a fairly new company, however they are not new to the industry. Established in February 2003, the UMI founders have more

than 50 years combined experience, which has taught them to deliver what clients value most; service.

Above and beyond delivering quality projects on time and within budget, their client service involves personal attention and dedication to detail; and every member of the UMI team is committed to providing this level of service. From commercial properties to retail establishments, data centers to office/R&D, UMI's expertise will get the job done right.

Tom Sosine, CEO and Co-Owner of UMI, has 35 years experience of construction and HVAC industry experience and focuses on sales and construction operations. Jon Gundersen, President and Co-Owner, has more than 25 years experience in the HVAC industry and focuses on business development, estimating, sales and project management. Co-Owners, Jon and Tom, worked together for 11 years before starting UMI; and they have successfully grown their company from a \$6.5 million dollar company in 2004 to a \$21 million dollar company in 2005.

Mark Yeager, Director of Architectural Sheet Metal, has over 18 years experience in the Architectural Metals field. Mark focuses on business development, sales, project management, and estimating. Rich Wilson, Operations Manager, has almost 25 years experience in the industry and oversees the field operations at UMI.

The UMI Architectural Division specializes in high-profile architectural projects and has had phenomenal growth in the last year; growing from \$220,000 to \$3 million in 2005.

Throughout Northern California, commercial clients turn to UMI for their HVAC needs. From piping and ductwork to air and water balance, UMI engineers are trained to deliver solutions that are energy efficient and environmentally friendly.

The UMI Design Build Team delivers innovative solutions when facilities require a specialized mechanical system; clients are in good hands with their engineering expertise. They listen to their clients needs, then combine innovative ideas with sound technology to create and install a customized system that meets exacting standards and exceeds expectations.

UMI's Service Division is available 24 hours a day, and also provides upgrades and preventative maintenance programs to keep systems running smoothly.

UMI's will fabricate any job in-house to reduce cost and ensure on-time completion of their projects.

UMI is a customer oriented company rather than a project oriented company. Owners Jon Gundersen and Tom Sosine feel UMI's growth has been based on their quality of employees. Everyone works well together as a team in both their internal and external relationships. UMI Team Projects have been a major contributor to their success.
